

Examenopdracht Front-end Web Development

- Student: Robin Wyffels
- Studentnummer: 202079173
- E-mailadres: robin.wyffels@student.hogent.be

Project Description

This Project is meant to be a site where users can easily find information about a wide range of products. Users will then find a detailed page of the product they searched for with every nutritional value possible. Users also get the choice to get this information for a specific amount, to be selected by the user. This makes the website usefull for athletes, and people with specific diets.

Requirements

the project requires the following programs:

- [NodeJS](#)
- [Yarn](#)
- [MySQL Community Server](#)

Installation Instructions

1. Clone the repository:

```
git clone https://github.com/Web-IV/2223-webservices-RobinWyffels.git
```

2. Navigate to the project directory:

```
cd .\FoodBuddy\
```

3. Install dependencies:

```
yarn install
```

Usage

To start the development server, run:

```
yarn run dev
```

To run tests, use:

```
yarn run test
```
